SUMMARY

Backend developer with 4.5+ years of experience designing, building, and scaling production systems in Python/Django, FastAPI, and .NET. Progressed from intern to senior-level backend engineer, owning API design, database architecture, microservices, and deployment pipelines for SaaS platforms. Comfortable in fully remote, cross-team environments, driving technical decisions end-to-end.

EXPERIENCE

Software Developer (Senior-Level, Backend Development) — *I.D.E.N.T.V.* *Jun 2025 – Present*
Nepal — A.I Solution Pvt. Ltd.

Kathmandu, Nepal (Flexible Remote / Occasional On-site)

- Progressed from core development duties to senior-level backend ownership within months, taking on system architecture and technical decision-making responsibilities.
- Design, develop, and deploy scalable backend applications, APIs, and microservices using Python, Django, Django REST Framework, FastAPI, and .NET.
- Build and maintain data layers across PostgreSQL, MySQL, MongoDB, Redis, and Qdrant, and implement real-time/async communication via WebSockets, RabbitMQ, REST, and gRPC.
- Own CI/CD pipelines (Jenkins, Docker, Git) and implement RBAC for secure, role-based access; collaborate fully remotely across teams on architecture reviews and production debugging.

Backend Developer — *Ayata Incorporation Pvt. Ltd.* *Feb 2022 – Jun 2025*

Kathmandu, Nepal

- Developed and maintained backend systems in Python (Django), building and shipping RESTful APIs used across production applications.
- Designed and optimized database schemas and queries, and strengthened security practices, improving application performance, stability, and safe data handling in production.
- Recognized by leadership for consistent technical delivery, problem-solving, and strong cross-functional collaboration.

Backend Developer Intern — *Ayata Incorporation Pvt. Ltd.* *Jan 2022 – Feb 2022*

Kathmandu, Nepal

- Gained hands-on production experience building backend features and API integrations with Python and Django, leading to a full-time offer as Backend Developer.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework, FastAPI, .NET, C#

Databases: PostgreSQL, MySQL, MongoDB, Redis, Qdrant (Vector DB)

APIs & Messaging: REST APIs, gRPC, WebSockets, RabbitMQ

DevOps & Tools: Docker, CI/CD, Jenkins, Git

Architecture: Microservices, SaaS Architecture, RBAC, System Design

EDUCATION

B.Sc. CSIT — Tribhuvan University

LEADERSHIP & VOLUNTEERING

IT Lead (Volunteer) — *Leo Club of Kathmandu Budigandaki* *Jun 2026 – Present*

Kathmandu, Nepal

- Lead IT strategy and manage the club's digital presence, including designing and building its official website.
- Maintain site content, galleries, and event pages; support digital coordination for community service and youth leadership programs.
